Save Time by Reducing the Number of Scans
Multi-Crop

Place various sized documents on the flatbed and scan them all at once, then crop whatever parts you need. This is convenient for scanning multiple business cards and thick documents.
ADF   Flatbed

Place documents in ADF

Place a book on Flatbed

Easily Get the Data You Need from Each Page
2-Page Separation

Use the flatbed to scan 2-page spreads from books, magazines, etc., and automatically divide the single image into two single sheets*. Dividing scanned documents saves time and trouble because it makes complex editing operations unnecessary.

*Divided lengthwise or crosswise. The length of the scanned document is divided in half. The division is not based on the content of the document.

ADF   Flatbed

Place documents in ADF

Place a book on Flatbed

Hassle-Free Consecutive Scanning
ADF/Flatbed Scanning

Now you can consecutively scan ADF and flatbed documents in one simple operation, greatly improving work efficiency.

ADF

Accurately Feed Various Sizes of Documents
Mixed Document Feeding

Left alignment   Center alignment   Right alignment

Documents with different sizes and thicknesses can be fed together. They can be center, right or left justified. By using left or right justification, there is no more need to spend time organizing documents according to their size, so scanning is fast and easy. This function greatly increases your productivity.

ADF

High-Speed Scanning for Long Paper
Long Paper Mode

The highly reliable paper feed mechanism quickly and accurately scans long documents. This function boosts work efficiency by smoothly scanning long monitoring sheets, like those used for EKG documents.
